Subject: Lower Passaic restoration

David,

I have been doing some work with Laura Kelm of the Great Swamp Watershed Association up in the headwaters of the Passaic and have two requests for you as community involvement contact for the lower Passaic restoration project:

* Would you be able to arrange a visit to the project for me, with a focus on methods used to ensure the water returned to the river after removal of pollutants meets EPA standards?

* Would you be able to have someone knowledgeable at the Lyndhurst Park site to speak to a group of high school students that Laura plans to bring for a visit in October? She is cc'ed here and you can contact her directly to work out details of her visit.

Thanks,

George Finlay
